New features

Multi-function portables 210/310

Designed for the field

New portable, multi-function instruments are designed for ease of use in the field.
An overmoulding made of elastomere protects the instrument, guarantees shockproofing and is comfortable to hold.

The internal memory of 1,000 datasets of 20,000 measuring points allows you to record all your measurements.

Elastomere Overmoulding

Ease of use

With a large, graphic, color display (AMI 310) or black and white display (Class 210), the new multi-function portable instruments are user-friendly:

- 10-key keypad
- graphic and intuitive interface
- built-in magnet system
- built-in probe holder.

HD **Graphical Wide screen**

New features

Multi-function portables 210/310

Nonstop measurements

This new generation of instruments has an interchangeable and rechargeable Li-ion battery.

Class 210 models have 48h battery life, and AMI 310 has 16h battery life.

48h Large Autonomy

Scalable instruments

With the different measuring modules (coming in option), the instruments can meet your technical requirements.

Modules: pressure, 4-thermocouple channels, climatic conditions, U coefficient.

Interchangeable Probes & Modules

Interchangeable probes

The new probes utilise a mini-Din connecting cable which is compatible with all probes.

KIMO has designed a new series of interchangeable probes including rotating vane and telescopic hotwire.

AMI 310

AMI 310 is a multi-probe instrument which can measure up to 6 parameters simultaneously.

- Wireless Probes
- Data processing Software
- Interchangeable Probes & Modules
- Micro-SD Card
- Graphical Display
- Color Wide screen

Measuring ranges

- ±500 Pa / ±2,500 Pa / ±10,000 Pa
- ±500 mbar / ±2,000 mbar
- Thermocouple: -200 to +1,760°C
- Pt 100: -200 to +600°C
- Humidity: 3 to 98 %RH
- CO: 0 à 500 ppm
- CO_2: 0 à 5,000 ppm

- Air velocity:
  -5 to 35 m/s (with vane)
  3 to 85 m/s (with Pitot tube)
- Airflow: 0 to 99,999 m^3/h
- Gas leak detection: 0 to 10,000 ppm
- Tachometry: 30 to 60,000 rpm

Expandable memory

Internal memory of 1,000 datasets of 20,000 measuring points.

AMI310 has a built-in location for a micro-SD memory card (supplied with the instrument)

Adapt your AMI 310

All our Smart 2014 probes and modules are compatible with AMI310 multi-function instrument.

You can either choose the kits in our product range or customize your own kit with probes and modules according to your needs.

Airflow / Pressure / Air velocity

DBM 620 - For airflow commissioning and balancing

Technical specifications

DBM 620 can be used on any supply or exhaust, air distributors: rectilinear, helical and toric.

- Quick and simple hood changes
- Measuring range from 40 to 3,500 m³/h
- Simultaneous display of airflow and temperature
- Automatic airflow direction (extraction or air blast)
- Supplied with 610x610 mm hood
- 4 others hoods are available as options: 720x720 mm, 720x1,320 mm, 420x1,520 mm, 1,020x1,020 mm

Interchangeable Hoods

Pa **Micromanometer Function**

Calculation functions and autonomous micro-manometer

The electronic housing can be disconnected to be used as a micro-manometer.

DBM 620 is a key instrument for your measurements in air systems: connected to a Pitot tube, it allows the measurement of air velocity or flow inside a duct, and connected to 2 silicone tubes, it allows the checking of filter condition in air-handling units.

Remote velocity grid

Designed for air velocity measurements on any type of large ceiling vent or diffuser.

The grid is similar to the DBM 620 grid. It calculates the average air velocity from 24 points to guarantee a reliable measurement. The grid is attached to a telescopic (maximum length is 2,05 m) and articulated pole (0 to 90°). Struts of 3 differents lengths allow for correct positioning of the grid on the ceiling surface.

A backpack allows easy carriage of the grid and its accessories (telescopic pole, articulation, 2 x 2,5m of silicone tube, positioning strut and electronic housing).

- Measurement and spot check of solar power
- Calculation of energetic exposure
- Results saved when instrument is switched off
- Hold/Min/Max functions
- 1 to 1300 W/m^2
- 1 Wh/m^2 to 500 kWh/m^2
- Supplied with calibration certificate

IP68 **Waterproof Solar cell**

SL 200

- Measurement and spot check of solar irrigation (instantaneous, average, time-recording)
- Calculation of energetic exposure
- Storage and saving of average values of power
- Recorded datas can be read on the display, and the graphic function allows a fast interpretation of the measured file
- Hold/Min/Max functions
- 1 to 1300 W/m^2
- 1 Wh/m^2 to 500 kWh/m^2
- Supplied with calibration certificate
