#### Standalone models

- Unique code, high-level coding conforming to ISO 14119
- 2 OSSD safety outputs
- Embedded EDM (external device monitoring)
- Manual or automatic start/restart depending on model
- Male 8-pin M12 connector
- IP 69K
- Numerous possible mounting configurations due to rotary transponder and symmetrical design
- Operation possible without safety control unit

#### Category 4/PL = e and SIL3

**XCSRC11AM12 and XCSRC11MM12**  
Unique pairing (1)

**XCSRC31AM12 and XCSRC31MM12**  
Two new pairings possible (2)

Page 4

#### Daisy-chain models for series connection

- Unique code, high-level coding conforming to ISO 14119
- Up to 20 switches can be connected in series without impacting the safety level
- 2 OSSD safety outputs
- 2 male 5-pin M12 connectors for direct series connection
- IP 69K
- Diagnosis of the whole chain of switches possible using the optional diagnostic module (see page 7)
- Numerous possible mounting configurations due to rotary transponder and symmetrical design

#### Category 4/PL = e and SIL3 (if combined with an appropriate Preventa XPS safety control unit category 4/PL = e - SIL3)

**XCSRC12M12**  
Unique pairing (1)

**XCSRC32M12**  
Two new pairings possible (2)

Page 5

#### Single models for point-to-point connections

- Unique code, high-level coding conforming to ISO 14119
- Point-to-point connection to a safety controller or safety PLC
- 2 OSSD safety outputs
- Male 5-pin M12 connector
- IP 69K
- Numerous possible mounting configurations due to rotary transponder and symmetrical design

#### Category 4/PL = e and SIL3 (if combined with an appropriate Preventa XPS safety control unit category 4/PL = e - SIL3)

**XCSRC10M12**  
Unique pairing (1)

**XCSRC30M12**  
Two new pairings possible (2)

Page 6

(1) The reader and transponder are supplied together, already paired in factory with a unique code.

(2) For these switches, the reader and transponder are supplied together, already paired in factory with a unique code. However, the reader can be re-paired (twice only) with a new (blank) transponder (see page 7). Once the new transponder has been paired, the previous transponder is no longer usable. A new, blank transponder can only be paired once.

Type of contactless RFID switch		Standalone XCSR $\bullet$ 1AM12 and XCSR $\bullet$ 1MM12	Daisy-chain XCSR $\bullet$ 12M12 and XCSR $\bullet$ 32M12	Single XCSR $\bullet$ 10M12 and XCSR $\bullet$ 30M12
<b>Environment</b>				
Conforming to standards		ISO 14119, EN/IEC 60947-5-2, EN/IEC 60947-5-3 UL 508 (1), CSA C22.2 SIL 3 (IEC 61508), SILCL 3 (IEC 62061), PL <sub>e</sub> -Cat.4 (EN ISO 13849-1)		
Product certifications		CE, cULus, TÜV, FCC, EAC, IC, RCM, E2, ECOLAB		
Maximum safety level (2)		SIL3 conforming to EN/IEC 61508, PL <sub>e</sub> =e, category 4 conforming to EN/ISO 13849-1		
Ambient air temperature	For operation	°C	-25...+70 °C (-13...+158 °F)	
	For storage	°C	-40...+85 °C (-40...+158 °F)	
Vibration resistance	Conforming to EN/IEC 60068-2-6		10 gn (10...150 Hz)	
Shock resistance	Conforming to EN/IEC 60068-2-27		30 gn, 11 ms	
Protection against electric shock	Conforming to EN/IEC 61140		Class III	
Degree of protection	Conforming to EN/IEC 60529		IP 65, IP 66, IP 67	
	Conforming to DIN 40050		IP 69K	
Materials		Thermoplastic housing (Valox™)		
<b>Characteristics</b>				
Rated operating characteristics (3)			U <sub>e</sub> : 24 V $\overline{\text{---}}$ , -20%...+10%, I <sub>e</sub> : $\overline{\text{---}}$ 60 mA (without load)	
Rated impulse withstand voltage (U <sub>imp</sub> )	Conforming to EN/IEC 60947-5-2	kV	0.8	
Integrated output protection			Short-circuit protection	
Connection	Conforming to EN/IEC 60947-5-2-A3 and EN/IEC 61076		M12 connector (A coding)	
Safety outputs 2 PNP NO OSSDs (output signal switching devices)	Maximum current	mA	400	200
Maximum switching frequency		Hz	0.5	
Delay	Power-on	s	< 5	
Typical response time (on transponder entry into operating zone)		ms	250 ms	120 ms + 50 ms per additional switch
Risk time (on transponder exit from operating zone)		ms	< 120 ms	< 120 ms + 18 ms per additional switch
Probability of dangerous failure per hour PFH <sub>d</sub>	Conforming to EN/ISO13849-1 and EN/IEC 62061		5 x 10 <sup>-10</sup>	
Tightening torque	M4 retaining screw		1.5 N.m (13 lb-in)	
	M12 connectors		1 N.m (8.85 lb-in)	
Mission time (TM)			20 years	
RFID protocol			Based on ISO 15693	
<b>Functions</b>				
Functions			- Operation possible without safety interface - Manual or automatic restart depending on model - External device monitoring (EDM)	- Integrated series connections - Connection to a safety interface (safety relay, for example) - Series diagnostic (with diagnostic module XCSR $\bullet$ D210MDB)
				- Point-to-point connection to a safety interface (safety controller or safety PLC, for example)

(1) The switch safety function has been assessed by TÜV Nord, not by UL.

(2) With an appropriate, correctly connected safety control system for Daisy-chain and Single models.

(3) Use a safety extra-low voltage (SELV) or protected extra-low voltage (PELV) power supply.

Type

Standalone contactless RFID safety switches

Certified

Connection via M12 connector

### Detection characteristics (2)

Typical operating sensing distance (for detection of transponder presence)	15 mm
Assured operating sensing distance	Sao: 10 mm
Typical release sensing distance (for detection of transponder absence)	18 mm
Assured release distance	Sar: 35 mm
Repeat accuracy	≤ 10% x Sr
Hysteresis	3% x Sr ≤ H ≤ 20% x Sr (Sr: real sensing distance)

### State of outputs

Output states shown are with the dedicated transponder positioned in front of the reader.

- Outputs closed
- Outputs opened
- Transient state

Sao: Assured operating sensing distance  
Sar: Assured release distance  
Conforming to EN/IEC 60947-5-3

### Connections

#### 8-pin M12 connector

(1) The start command is effective after the operator has pressed and released the start button.

(2) These values are given for a face-to-face mounting configuration of the reader and transponder on a non-magnetic support, without misalignment between the transponder and the reader, and at an ambient temperature between +20 and +25 °C.

Type

Daisy-chain contactless RFID safety switches

Certified

Connection via M12 connectors

### Diagnostic module for Daisy-chain RFID safety switches

The **XCSR210MDB** module interprets the diagnostic data from the whole chain of switches and makes this information available into Modbus registers. There are two RJ45 Modbus communication connectors available for connecting external peripheral devices (such as an HMI terminal, for example).

Main characteristics of the diagnostic function:

- It provides the state of all the **XSRC•M12** switches monitored by the safety chain.
- It identifies which protection devices are opened or closed.
- It helps to prevent from a restart of the machine if the chain has been unintentionally or deliberately tampered with; if an error has been detected on any of the safety switches; or if any of the wiring becomes disconnected.
- It detects if the loopback device **XCSRZE** is not connected and helps to prevent from a new start until the loopback device has been reconnected and a new power cycle completed.

Description	For RFID safety switches	Reference	Weight kg
<ul style="list-style-type: none"> <li>■ Modbus RTU</li> <li>■ 2 RJ45 outputs</li> <li>■ 2 LEDs</li> <li>■ 1 volt-free contact representative of the state of the chain</li> </ul>	XSRC12M12, XSRC32M12	<b>XCSR210MDB</b>	0.100

Diagnostic module

XCSR210MDB

Loopback device

XCSRZE

#### Mounting

Examples of face-to-face mounting configurations (recommended)

*e*: minimum recommended mounting distance between reader and transponder

*e* min. > 2 mm  
*d*: detection limit

#### Example of side-by-side mounting

*e*: minimum recommended mounting distance between reader and transponder

#### Minimum mounting distances between safety switches

#### Detection curves

##### Face-to-face mounting (recommended configuration)

Sao and Sar sensing distances along Y axis as a function of Z  
Longitudinal misalignment for X = 0

Sao and Sar sensing distances along X axis as a function of Z  
Transverse misalignment for Y = 0

##### Side-by-side mounting

Sao and Sar sensing distances along Y axis as a function of X  
Longitudinal misalignment for Z = 0

Sao and Sar sensing distances along Z axis as a function of X  
Transverse misalignment for Y = 0

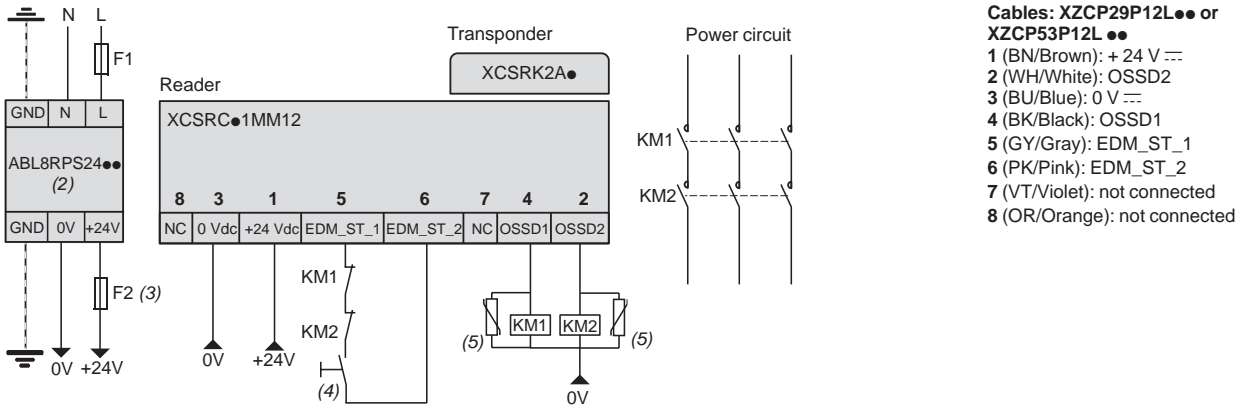

Sao: Assured operating sensing distance

Sar: Assured release distance

: e: minimum recommended mounting distance between reader and transponder

#### Standalone contactless RFID safety switches: XCSRC11AM12, XCSRC11MM12, XCSRC31AM12, and XCSRC31MM12

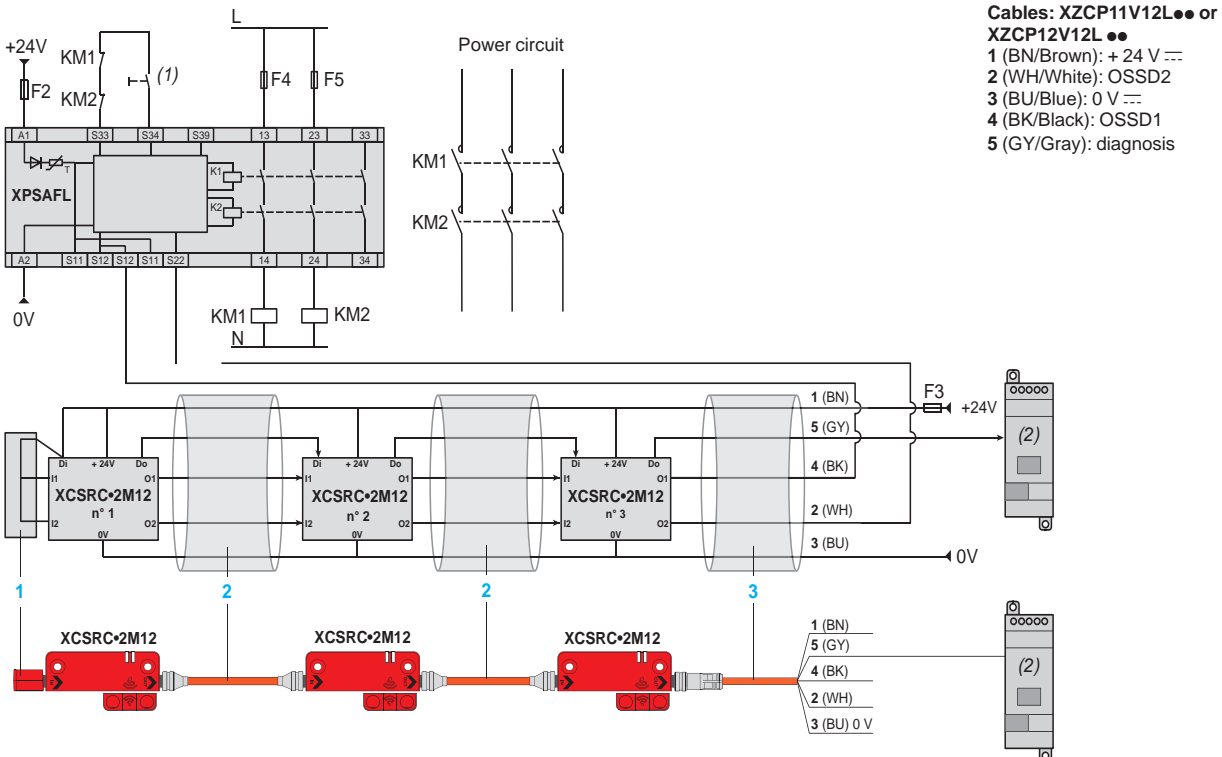

Example of Category 4/PL = e/SIL 3 connection, with monitored start (1) and monitoring loop for contactors (EDM)

- (1) The restart command is effective after the operator has pressed and released the restart button. See Note (4).
- (2) Schneider Electric product. The power supply must meet the requirements of standard IEC 60204-1 relating to safety extra-low voltage (SELV) or protected extra-low voltage (PELV) power supplies.
- (3) 1 A max.
- (4) Restart button.
- (5) The use of arc suppressors is recommended for KM1 and KM2.

#### Daisy-chain contactless RFID safety switches: XCSRC12M12 and XCSRC32M12

Example of Category 4/PL = e/SIL 3 series connection

- 1 Loopback device XCSRZE (see page 7)
- 2 Jumper cables XZCR1111064D●● (see page 8)
- 3 Pre-wired connectors XZCP11V12L●● or XZCP12V12L●● (see page 8)

- (1) Start button
- (2) Diagnostic module XCSR210MDB (optional, see page 7)

#### Single contactless RFID safety switches: XCSR10M12 and XCSR30M12

Example of Category 4/PL = e/SIL 3 connection to a safety relay XPSAK●●

- (1) Operating status of internal electronic fuse
- (2) XCSR safety switch indicator light disabled
- (3) Start button
- ESC: External start conditions

#### Example of Category 4/PL = e/SIL 3 connection to a safety controller XPSMCMCP0802

- (1) Schneider Electric product. The power supply must meet the requirements of standard IEC 60204-1 relating to safety extra-low voltage (SELV) or protected extra-low voltage (PELV) power supplies.
- (2) 1 A max.
- (3) Monitoring of contactors (EDM: external device monitoring).
- (4) Restart button.
