KT 20

Temperature datalogger

Miniature datalogger for internal temperature, the KT-20 allows to record instantaneously the measured values. The KILOG 2015 software enables to configure and download the dataloggers.

- Fast data download (up to 1400 values/ second)
- Up to 8192 measurement points

- 2 configurable setpoint alarms
- Small dimensions
- IP 56 housing

Recorder functions

KT-20 can record measurements in real time. To do so, you just have to select the launch type:
- "immediate"
- "delayed" (with predefined date and time)
- "according alarm" : record is made when a measurement exceeds the setpoint alarm (function available on KT-20-L and KT-20-T models)

The dataset will stop once the storage capacity is full.
You can also choose the non-stop record ("loop" recording option).

Dimensions

5,89 mm

KIMO

17,35 mm

*When used at a temperature higher than 50 °C, the battery life of datalogger is reduced.
- on the basis of 1 measurement each minute at 20°C (KT-20-G)
- on the basis of 1 measurement each 10 minutes at 20°C (KT-20-L/T)
** All accuracies indicated in this document were stated in laboratory conditions and can be guaranteed for measurements carried out in the same conditions, or carried out with calibration compensation.
